

Problem

How do I reconnect a panel after a component is restarted?

Solution

If we connect an ABeans panel to a component via the ABeans Selector widget and the DO is restarted, the panel has currently no way of automatically reconnecting to the restarted component.

Right-click on Selector, you get options to reconnect or to refresh all the lists in the selector.

This problems were fixed ACS versions after 4.1.2. After next release text should be:

If we connect an ABeans panel to a component via the ABeans Selector widget and the DO is restarted, the panel automatically reconnects to the restarted component.

Right-click on Selector, you get options to manually reconnect to the currently selected component. Click on **Refresh** button in selector to reload from manager all the lists in the selector.
