Problem

How is the documentation for the acsexmpl module generated?

Solution

The documentation for the acsexmpl module is built using Doxigen documentation groups.

- The main Table of Contents is in the file:
  acsexmpl/ws/include/acsexmplDocumentation.h
  This is a *fake* include file used only for documentation purposes.
- The documentation generated out of this fake include renamed **main.html** and installed as the root page for the modul's documentation.
- This file needs to be extended and updated to cover all existing examples.

  Whenever a new example is created, is needs to be added here. ⚠ Many of them are missing now or the description is out of date.
- The TOC links to a "group" with the documentation concerning each specific example.
- The documentation for each "group" is in the specific include files and uses the defgroup tag, as in the following example:

```
/** @file acsexmplAmsSeqImpl.h
 */

/** @defgroup ACSEXMPLAMSSEQDOC Antenna Mount System Sequence
 *  @{
 * @htmlonly
 .......
```
