- FAQ - Software Development - General Development Environment
  - What are the minimum system requirements to run ACS?
  - How can I configure a user account for ACS development?
  - How can I build the complete ACS from scratch?
  - After having sourced the .acs/.bash_profile.acs environment setting script, I get a weird behavior
  - After having configured ACS for my account, I get error accessing files. For example the file .jacorb_properties cannot be found
  - How do I install multiple versions, minor versions and patches of ACS on the same machine at the same time? How do I switch between different versions of ACS?
  - How do I build/upgrade an ACS installation to a new CVS tag from sources?
  - How can more people do development with ACS on the same machine without disturbing each other?
  - How do I configure an ACS workstation to use a different hostname or IP address?
  - Problems connecting to ACS servers on a remote machine: bad /etc/hosts
  - Problems starting the Interface Repository. Bad network configuration
  - Working with new modules
  - How do I tell the version of a module or of an installed file?
  - Is it possible to install ACS on a file server?
  - How can I switch from one ACS release to another?
  - Why do I have (for some modules) make both the WS and LCU sides of a module even if I am only using the LCU side?
  - How do I get a core file when a Container crashes?
  - How do I get from cvs the files need for an ACS build?
  - Is it mandatory that I install ACS in the /alma directory?
- FAQ - Software Development - Makefile
  - Makefile does not rebuild code if include file is modified
  - Do I need to "make install" a module after having made changes, to be able to test it?
  - How do I build a module without debugging information?
  - What targets and options are available in the ACS subsystem Makefile?
  - How can I build/test only SPECIFIC modules in the ACS subsystem Makefile?
- FAQ - Software Development - Container / Component
  - How does ACS support writing Subsystem Master Components?
  - Do I need to make the methods on my component thread-safe or is that handled for me automatically?
  - Can I pass around directly a Component Reference from one Component to another?
  - Can I call getComponent and releaseComponent multiple times? How would the calls be handled?
  - What's the concept of offshoots, and when should I use it?
  - What are the possible template types for DevIOs?
  - Why should components not run GUIs?
- FAQ - Software Development - Basic Access and Control Interfaces
  - Why do I get strange exceptions such as CORBA::no_implement from the objexp tool when invoking certain methods of Java and Python BACI properties?
  - Why are stringSeq properties only implemented in the Java BACI prototype?
  - How do on-change monitors work?
  - How come string and pattern monitors are implemented differently from other types of monitors?
  - Why do on-change string, pattern, and stringSeq monitors ignore the delta change value?
  - What are archive monitors and how do they work?
  - What do all of the characteristics such as archive_min_int defined in $ACS_CDB/CDB/alma/ XMLs actually do?
  - What is the Alarm System and can it be used from my code?
- FAQ - Software Development - Modular Tests
  - How do I run a modular test when the value of $ACS_INSTANCE is not known until run-time?
  - When running TAT or make test, my prologue does not get executed. What is wrong here?
  - How can I run msqld automatically at boot time?
  - What do I do if my Junit TAT test doesn't produce any output at all?
- FAQ - Software Development - Notification Channel
  - Why isn't the channel also destroyed when I invoke Supplier/SimpleSupplier's disconnect method?
  - I know events are being sent but they cannot be received by Consumer classes. What's wrong?
  - Are there are limitations on how/where IDL events are defined?
  - Sometimes it takes longer than five seconds to receive an event after it was published. What's going on?
- FAQ - Software Development - ABeans
  - I am editing a GUI with NetBeans, but I cannot connect properties to displayers
  - I am editing a GUI but I cannot find the ABean for my Component/IDL interface
  - I am trying to use Net Beans 3.6, but I have problems
  - How do I reconnect a panel after a component is restarted?
  - The JTextArea used for messages extends all the time
- FAQ - Software Development - IDL
  - What is the '#pragma prefix' in IDL?
  - Why can't I use nested modules in IDL?
  - I am having problems with macros in IDL
  - What are the IDL limitations imposed by the ORBs we are using?
  - I get the following IDL error: prefix at declaration differs from prefix at definition or use
  - Why can't I use '_' or a number as an identifier in IDL?
  - Run time and compile time problems with IDL enum
  - How can I inherit from two different IDL interfaces?
- FAQ - Software Development - Python
  - Using the del keyword on a Python object does not seem to really invoke the destructor
  - The python ORB (omniORB) has a maximum message size
  - Why can't I import xyz IDL data definition from abc IDL namespace?
  - Why do I get omniORB.CORBA.BAD_PARAM: Minor: BAD_PARAM_WrongPythonType, COMPLETED_NO exceptions when invoking CORBA methods of components?
  - Why do I see Usage: python someFile.py ... on the command-line and get booted out of the Python interpreter after importing a module or package?

        - How and why does the Python ACS.ContainerServices getComponent method automatically narrow components?
        - Is there any possibility that I do not have to type in these very long Python commands?
        - Why can't I import mod1 and mod2 from the same package when they aren't in the same directory?
        - ACS is hogging all of the good command options. How can I use the command options I want?
- FAQ - Software Development - C++
    - Is it safe to return a 'const char *' from a local std::string?
    - How do I change the name GlobalLogger or StaticMethodLogger within C++ logs?
    - What is the C++ size in the mapping for CORBA types?
    - Why is [the linker | the library loader at runtime] complaining about an undefined symbol which I declared as static member of one of my classes?
    - I am setting an OK Completion in an asynchronous call, but the action thread reports an error. What is going on?
    - I want to try to find memory leaks in my application. How would I use valgrind?
    - Why is the SourceObject field always "GlobalLogger" when I log a Completion or Exception?
    - Why does my CPP program abort if an unexpeted exception is thrown? Is it not possible to catch it?
    - What are the maximum and minimum values of native numeric types?
    - When I start GDB with a core file, GDB does not load any symbols and/or cannot tell me where the core was dumped. What is wrong?
    - Logging (from threads not managed by ACS) does not work. What am I doing wrong?
- FAQ - Software Development - Java
    - What package should I use for the component implementation classes?
    - How can components use static variables and Singletons? Are there Classloader issues?
    - Why does my call to Runtime.getRuntime().exec("....") hang?
- FAQ - Software Development - Command Help
    - How do I create Java Help (online help) for an application?
    - How do I write a command help in Shell script (bash)?
    - How do I write a command help in Python?
    - How do I write a command help in Java?
    - How do I write a command help in C++?

- FAQ - Runtime - General Runtime Environment
    - Why is Java so much slower on a remote X display?
    - How do I change JacORB properties, for example to increase verbosity?
    - Which ports are used by ACS?
- FAQ - Runtime - Starting / Stopping / Diagnostics
    - How to start Services, Manager, Container silently and synchronizedly?
    - After I shutdown the manager, I still see the JVM in the process table for some time. Why?
    - When I try to stop and start a container again it fails. Why?
    - After a container segfaults and is restarted, objexp and other clients cannot seem to connect to components within the container. Why?
    - I get the following message: libgcc_s.so.1 must be installed for pthread_cancel to work. Why?
    - Questions on starting Acs on a remote host from the Acs Command Center
    - Running ACS in a limited resources machine
- FAQ - Runtime - Utilities
    - What tools are provided with JacORB and how can I start them within ACS?
    - How can I use the JLog gui remotely?
    - How can store logs and browse them later offline?
    - A command sent from Object Explorer timeouts after a few seconds. But my command would need more time
- FAQ - Runtime - Services
    - FAQ - Runtime - Services - CDB
        - How can I ensure my CDB XML or schema is correct without having to start the CDB?
        - XML Spy validates XML files, but the CDB itself reports strange errors
        - What are the relationships between Components and Configuration Database?
        - What are hierarchical components, and how can I add hierarchical components to the ACS CDB?
        - How can I add components to the ACS CDB without modifying $ACS_CDB/MACI/Components/Components.xml?
        - Can I put many xml files in the same directory to specify the deployment?
        - I have a Component with many Properties. Often I get failures accessing the CDB. What happens?
        - XML parser error, because the type's content type is empty
        - How can I change the encoding of my xml/xsd files?
    - FAQ - Runtime - Services - Interface Repository
        - How is the interface repository loaded?
        - How Can I reload some IDL in the interface repository?
        - What happens if the interface repository does not load properly?
- FAQ - Runtime - Manager
    - Why does manager print an error stack trace that begins with "Failed to invoke 'components_unavailable()"?
    - Can I increase the verbosity and details of Manager logs?
    - I had a running system that now breaks starting a Container
- FAQ - Runtime - Container / Component
    - FAQ - Runtime - Container / Component - C++
    - FAQ - Runtime - Container / Component - Java
    - FAQ - Runtime - Container / Component - Python
        - Why does the container emit a "Failed to create Python object" message when I try activating my component?
        - Why are some of my print statements not showing up in the container output section of acscommandcenter?
    - How do I deploy Components/Containers around distributed hosts?
    - What are default components, and how are they used?
    - What are dynamic components, and how are they used?
    - How are components initialized? What about cyclic dependencies?
    - My own client can access my component just fine, but object explorer gives an exception when I click on it - why?
    - How can I have proprietary data ("custom config") for my component?
    - How can I put definitions for dynamic components in multiple files?
    - What are startup components, and how can I define them in the ACS CDB?
- FAQ - Runtime - Client
    - FAQ - Runtime - Client - C++

        - Core dump on client side with exception message 'No usable profile in IOR.', completed = NO
    - FAQ - Runtime - Client - Python
        - Why does the getComponent method of ZLegacy/ACS.ContainerServices return an object of type None?
- FAQ - Runtime - BulkData
    - How is possible to configure protocol, host, port and number of flows in CDB for Bulk Data?
    - Running in parallel two systems that use Bulk Data
- FAQ - Runtime - BulkDataNT
    - What does it mean and how to interpret cbReceive took too long and cbReceive in AVG took too long messages?
    - What does it mean and how to interpret DataWriter protocol status .... and DataReader protocol status ..... messages?
    - BDNT configuration options
    - How to configure BDNT to use TCP ?
    - What to put in the Makefile?
    - How to use CDB bulkData NT configuration in my code?
    - How to run bulkData NT synthetic tests?
    - When and how NDDS_DISCOVERY_PEERS env. variable should be used?
    - Which bulkDataNTDefaultQosProfiles..xml is taken?
- FAQ - Runtime - Secure Communication
    - How to establish secure communications?

- FAQ - Miscellaneous - ACS Development Culture
    - How does the ACS team work?
- FAQ - Miscellaneous - Linux
    - How do I work disconnected from the network, for example with a notebook?
    - How do I setup DHCP?
    - I cannot see "dot files" on my CD-ROM (.acs directory)
- FAQ - Miscellaneous - RTAI
    - How do I install RTAI on a Linux machine to be used with ACS?
    - Some RTAI files need root permission and S-bit. But these are lost with a binary installation of ACS
    - Help! I get strange error messages when I do make install for my kernel module
    - After I installed the binary ACS installation, no kernel modules can be built / kernel module build fails due to missing include files
    - I am trying to use with ACS 6.0 an RTOS installation done with 5.0. I have errors
    - How is possible to set the threshold level of RT logs?
- FAQ - Miscellaneous - VMWare
    - How do I install a VM-Ware ACS image?
    - The time on the virtual machine is always wrong of a number of hours
- FAQ - Miscellaneous - Documentation
    - Where can I find the Doxygen-generated documentation on C++ defines?
    - The Doxygen-generated documentation for a C++ class is missing. Where is it?
    - How do I document command-line parameters for (C++) executable files?
    - Which format shall I use for long long with ACS_LOG?
    - How is the documentation for the acsexmpl module generated?

Title	Creator	Modified	
How can more people do development with ACS on the same machine without disturbing each other?	Tomas Staig	Jul 24, 2020	
Which ports are used by ACS?	Tomas Staig	Jul 24, 2020	
Problems connecting to ACS servers on a remote machine: bad /etc/hosts	Tomas Staig	May 18, 2020	
Why does the getComponent method of ZLegacy/ACS.ContainerServices return an object of type None?	Tomas Staig	May 15, 2020	
Why are some of my print statements not showing up in the container output section of acscommandcenter?	Tomas Staig	May 15, 2020	
Why does the container emit a "Failed to create Python object" message when I try activating my component?	Tomas Staig	May 15, 2020	
How does the ACS team work?	Tomas Staig	May 15, 2020	1
How is the documentation for the acsexmpl module generated?	Tomas Staig	May 15, 2020	
Which format shall I use for long long with ACS_LOG?	Tomas Staig	May 15, 2020	

How do I document command-line parameters for (C++) executable files?	Tomas Staig	May 15, 2020
The Doxygen-generated documentation for a C++ class is missing. Where is it?	Tomas Staig	May 15, 2020
Where can I find the Doxygen-generated documentation on C++ defines?	Tomas Staig	May 15, 2020
I cannot see "dot files" on my CD-ROM (.acs directory)	Tomas Staig	May 15, 2020
How do I setup DHCP?	Tomas Staig	May 15, 2020
How do I work disconnected from the network, for example with a notebook?	Tomas Staig	May 15, 2020
How is possible to set the threshold level of RT logs?	Tomas Staig	May 15, 2020
I am trying to use with ACS 6.0 an RTOS installation done with 5.0. I have errors	Tomas Staig	May 15, 2020
After I installed the binary ACS installation, no kernel modules can be built / kernel module build fails due to missing include files	Tomas Staig	May 15, 2020
Help! I get strange error messages when I do make install for my kernel module	Tomas Staig	May 15, 2020
Some RTAI files need root permission and S-bit. But these are lost with a binary installation of ACS	Tomas Staig	May 15, 2020
How do I install RTAI on a Linux machine to be used with ACS?	Tomas Staig	May 15, 2020
The time on the virtual machine is always wrong of a number of hours	Tomas Staig	May 15, 2020
How do I install a VM-Ware ACS image?	Tomas Staig	May 15, 2020
Core dump on client side with exception message 'No usable profile in IOR.', completed = NO	Tomas Staig	May 15, 2020
How to establish secure communications?	Tomas Staig	May 15, 2020
Which bulkDataNTDefaultQosProfiles..xml is taken?	Tomas Staig	May 15, 2020
When and how NDDS_DISCOVERY_PEERS env. variable should be used?	Tomas Staig	May 15, 2020
How to use CDB bulkData NT configuration in my code?	Tomas Staig	May 15, 2020
How to run bulkData NT synthetic tests?	Tomas Staig	May 15, 2020
What to put in the Makefile?	Tomas Staig	May 15, 2020
How to configure BDNT to use TCP ?	Tomas Staig	May 15, 2020
BDNT configuration options	Tomas Staig	May 15, 2020
What does it mean and how to interpret DataWriter protocol status .... and DataReader protocol status ..... messages?	Tomas Staig	May 15, 2020

What does it mean and how to interpret cbReceive took too long and cbReceive in AVG took too long messages?	Tomas Staig	May 15, 2020
Running in parallel two systems that use Bulk Data	Tomas Staig	May 15, 2020
How is possible to configure protocol, host, port and number of flows in CDB for Bulk Data?	Tomas Staig	May 15, 2020
I have a Component with many Properties. Often I get failures accessing the CDB. What happens?	Tomas Staig	May 15, 2020
What are startup components, and how can I define them in the ACS CDB?	Tomas Staig	May 15, 2020
Can I put many xml files in the same directory to specify the deployment?	Tomas Staig	May 15, 2020
How can I put definitions for dynamic components in multiple files?	Tomas Staig	May 15, 2020
How can I add components to the ACS CDB without modifying $ACS_CDB/MACI/Components/Components.xml?	Tomas Staig	May 15, 2020
What are hierarchical components, and how can I add hierarchical components to the ACS CDB?	Tomas Staig	May 15, 2020
What are the relationships between Components and Configuration Database?	Tomas Staig	May 15, 2020
How can I have proprietary data ("custom config") for my component?	Tomas Staig	May 15, 2020
What's the concept of offshoots, and when should I use it?	Tomas Staig	May 15, 2020
I had a running system that now breaks starting a Container	Tomas Staig	May 15, 2020
My own client can access my component just fine, but object explorer gives an exception when I click on it - why?	Tomas Staig	May 15, 2020
How are components initialized? What about cyclic dependencies?	Tomas Staig	May 15, 2020
What are dynamic components, and how are they used?	Tomas Staig	May 15, 2020
What are default components, and how are they used?	Tomas Staig	May 15, 2020
How do I deploy Components/Containers around distributed hosts?	Tomas Staig	May 15, 2020
Can I increase the verbosity and details of Manager logs?	Tomas Staig	May 15, 2020
Why does manager print an error stack trace that begins with "Failed to invoke 'components_unavailable()"?	Tomas Staig	May 15, 2020
What happens if the interface repository does not load properly?	Tomas Staig	May 15, 2020
How Can I reload some IDL in the interface repository?	Tomas Staig	May 15, 2020
XML Spy validates XML files, but the CDB itself reports strange errors	Tomas Staig	May 15, 2020
How can I ensure my CDB XML or schema is correct without having to start the CDB?	Tomas Staig	May 15, 2020

How is the interface repository loaded?	Tomas Staig	May 15, 2020
How can I change the encoding of my xml/xsd files?	Tomas Staig	May 15, 2020
XML parser error, because the type's content type is empty	Tomas Staig	May 15, 2020
A command sent from Object Explorer timeouts after a few seconds. But my command would need more time	Tomas Staig	May 15, 2020
How can store logs and browse them later offline?	Tomas Staig	May 15, 2020
What tools are provided with JacORB and how can I start them within ACS?	Tomas Staig	May 15, 2020
How can I use the JLog gui remotely?	Tomas Staig	May 15, 2020
Questions on starting Acs on a remote host from the Acs Command Center	Tomas Staig	May 13, 2020
I get the following message: libgcc_s.so.1 must be installed for pthread_cancel to work. Why?	Tomas Staig	May 13, 2020
After a container segfaults and is restarted, objexp and other clients cannot seem to connect to components within the container. Why?	Tomas Staig	May 13, 2020
When I try to stop and start a container again it fails. Why?	Tomas Staig	May 13, 2020
After I shutdown the manager, I still see the JVM in the process table for some time. Why?	Tomas Staig	May 13, 2020
How to start Services, Manager, Container silently and synchronizedly?	Tomas Staig	May 13, 2020

Why is Java so much slower on a remote X display?	Tomas Staig	May 13, 2020
How do I write a command help in C++?	Tomas Staig	May 13, 2020
How do I write a command help in Java?	Tomas Staig	May 13, 2020
How do I write a command help in Python?	Tomas Staig	May 13, 2020
How do I write a command help in Shell script (bash)?	Tomas Staig	May 13, 2020
How do I create Java Help (online help) for an application?	Tomas Staig	May 13, 2020
Why does my call to Runtime.getRuntime().exec("....") hang?	Tomas Staig	May 13, 2020
How can components use static variables and Singletons? Are there Classloader issues?	Tomas Staig	May 13, 2020
What package should I use for the component implementation classes?	Tomas Staig	May 13, 2020
Logging (from threads not managed by ACS) does not work. What am I doing wrong?	Tomas Staig	May 13, 2020

When I start GDB with a core file, GDB does not load any symbols and/or cannot tell me where the core was dumped. What is wrong?	Tomas Staig	May 13, 2020
What are the maximum and minimum values of native numeric types?	Tomas Staig	May 13, 2020
Why does my CPP program abort if an unexpeted exception is thrown? Is it not possible to catch it?	Tomas Staig	May 13, 2020
What are the possible template types for DevIOs?	Tomas Staig	May 13, 2020
Why is the SourceObject field always "GlobalLogger" when I log a Completion or Exception?	Tomas Staig	May 13, 2020
I want to try to find memory leaks in my application. How would I use valgrind?	Tomas Staig	May 13, 2020
I am setting an OK Completion in an asynchronous call, but the action thread reports an error. What is going on?	Tomas Staig	May 13, 2020
Why is [the linker | the library loader at runtime] complaining about an undefined symbol which I declared as static member of one of my classes?	Tomas Staig	May 13, 2020
What is the C++ size in the mapping for CORBA types?	Tomas Staig	May 13, 2020
How do I change the name GlobalLogger or StaticMethodLogger within C++ logs?	Tomas Staig	May 13, 2020
Is it safe to return a 'const char *' from a local std::string?	Tomas Staig	May 13, 2020
ACS is hogging all of the good command options. How can I use the command options I want?	Tomas Staig	May 13, 2020
Why can't I import mod1 and mod2 from the same package when they aren't in the same directory?	Tomas Staig	May 13, 2020
Is there any possibility that I do not have to type in these very long Python commands?	Tomas Staig	May 13, 2020
How and why does the Python ACS.ContainerServices getComponent method automatically narrow components?	Tomas Staig	May 13, 2020
Why do I see Usage: python someFile.py ... on the command-line and get booted out of the Python interpreter after importing a module or package?	Tomas Staig	May 13, 2020
Why do I get omniORB.CORBA.BAD_PARAM: Minor: BAD_PARAM_WrongPythonType, COMPLETED_NO exceptions when invoking CORBA methods of components?	Tomas Staig	May 13, 2020
Why can't I import xyz IDL data definition from abc IDL namespace?	Tomas Staig	May 13, 2020
The python ORB (omniORB) has a maximum message size	Tomas Staig	May 13, 2020
Using the del keyword on a Python object does not seem to really invoke the destructor	Tomas Staig	May 13, 2020
How can I inherit from two different IDL interfaces?	Tomas Staig	May 13, 2020
Run time and compile time problems with IDL enum	Tomas Staig	May 13, 2020
Why can't I use '_' or a number as an identifier in IDL?	Tomas Staig	May 13, 2020
I get the following IDL error: prefix at declaration differs from prefix at definition or use	Tomas Staig	May 13, 2020

What are the IDL limitations imposed by the ORBs we are using?	Tomas Staig	May 13, 2020	
I am having problems with macros in IDL	Tomas Staig	May 13, 2020	
Why can't I use nested modules in IDL?	Tomas Staig	May 13, 2020	
What is the '#pragma prefix' in IDL?	Tomas Staig	May 13, 2020	
The JTextArea used for messages extends all the time	Tomas Staig	May 13, 2020	
How do I reconnect a panel after a component is restarted?	Tomas Staig	May 13, 2020	
I am trying to use Net Beans 3.6, but I have problems	Tomas Staig	May 13, 2020	
I am editing a GUI but I cannot find the ABean for my Component/IDL interface	Tomas Staig	May 13, 2020	
I am editing a GUI with NetBeans, but I cannot connect properties to displayers	Tomas Staig	May 13, 2020	
Sometimes it takes longer than five seconds to receive an event after it was published. What's going on?	Tomas Staig	May 13, 2020	
Are there are limitations on how/where IDL events are defined?	Tomas Staig	May 13, 2020	
I know events are being sent but they cannot be received by Consumer classes. What's wrong?	Tomas Staig	May 13, 2020	
Why isn't the channel also destroyed when I invoke Supplier/SimpleSupplier's disconnect method?	Tomas Staig	May 13, 2020	
What do I do if my Junit TAT test doesn't produce any output at all?	Tomas Staig	May 13, 2020	
How can I run msqld automatically at boot time?	Tomas Staig	May 13, 2020	
When running TAT or make test, my prologue does not get executed. What is wrong here?	Tomas Staig	May 13, 2020	
How do I run a modular test when the value of $ACS_INSTANCE is not known until run-time?	Tomas Staig	May 13, 2020	
What is the Alarm System and can it be used from my code?	Tomas Staig	May 13, 2020	1
What do all of the characteristics such as archive_min_int defined in $ACS_CDB/CDB/alma/ XMLs actually do?	Tomas Staig	May 13, 2020	
What are archive monitors and how do they work?	Tomas Staig	May 13, 2020	
Why do on-change string, pattern, and stringSeq monitors ignore the delta change value?	Tomas Staig	May 13, 2020	
How come string and pattern monitors are implemented differently from other types of monitors?	Tomas Staig	May 13, 2020	
How do on-change monitors work?	Tomas Staig	May 13, 2020	
Why are stringSeq properties only implemented in the Java BACI prototype?	Tomas Staig	May 13, 2020	

Why do I get strange exceptions such as CORBA::no_implement from the objexp tool when invoking certain methods of Java and Python BACI properties?	Tomas Staig	May 13, 2020
Why should components not run GUIs?	Tomas Staig	May 13, 2020
Can I call getComponent and releaseComponent multiple times? How would the calls be handled?	Tomas Staig	May 13, 2020
Can I pass around directly a Component Reference from one Component to another?	Tomas Staig	May 13, 2020
Do I need to make the methods on my component thread-safe or is that handled for me automatically?	Tomas Staig	May 13, 2020
