 - pass: acsq3
- ACS Documentation
 - [Emilio Garcia](#) repository with examples
 - [Blog for specific topics weekly](#)
 - [Joseph Schwarz](#) will provide a list of initial topics
- 2020AUG + 2020OCT Release
- ACS Python 3 Porting
 - Python 3 made official in 2020AUG
- ACS Changes
 - Compatibility and new capabilities for the new Makefile being developed
 - Increased speed of ACS initialization script helper
 - Thread-safe improvements
 - ACS now compatible with gcc 8.3.1 and C++14, C++17 and C++2a (Draft of C++20 as of gcc version 8.3.1 20191121)
 - Components de/re-activation improvements
 - [Obsolescence Management Roadmap](#)
 - Boost (1.66.0) + Xerces-c (3.2.2)
 - Corrected Python package version (Open version, duplicates w/different versions, etc.)
 - Java Dependencies now installed with Maven as part of ExtProds

- Code to allow random delay when starting monitoring in a component to prevent too much simultaneous hardware demand from components sharing hardware resources (Network, CAN channel, etc.)
 - Python imports no longer require ACS to be running. The code that was implemented in this way, was changed to be used as a singleton instead
 - ComponentCaller now supports simple asynchronous calls that depend on basic callbacks (CBvoid, CBfloat, ...)
 - Future releases will increase the functionality to support custom callbacks
 - Improvements to properly support Octet sequence in Python simulator and objexp (Problems seen in ACS workshop!)
- CentOS / RHEL 8
 - ACS compatibility finished and test cases working normally
- Monotonic Clock tests done
- Communication and Collaboration
 - Docker Hub ACS Image
 - 2020.08 version available with CentOS
 - 2020.08 version with CentOS 8 being prepared
 - 2020.10 version will start in the following days
 - Issue Tracking platform for the community
 - Confluence Page Access
 - Fork/Branches on public repository
 - Slack as Community Chat
- Re-design Notification Channels
- BulkData
- [Obsolescence Management](#)
- C++ Modernization Project
- ASTRI/INAF
 - Significance of OpenJDK warning: Archived non-system classes are disabled because the java.system.class.loader property is specified (value - "alma.acs.classloading.AcsSystemClassLoader")...
 - MasterComponent: status, documentation, Java implementations TBD for relevant BACI properties
